Issues

Login page: https://employer.rain.us/#/login

Authentication - Login - Unhide password after the password field focus has changed

Given that I am in Login page

When a value is inserted in password field

And the field focus is changed

Then should be possible to click in "unhide password" button (eyes) to see the value inserted

PASSWORD

•••••••••   Forgot?

Sign In

Authentication - Forget Password - A inexistent confirmation code is inserted

Given that I am in Login page to "forget password" flow
**When** a valid e-mail is inserted
And a inexistent "confirmation code" is inserted
**Then** should be not possible to proceed and create a new password

◉ Rain
